ETL vs. UL: THE DIFFERENCE IS SERVICE.

When it comes time to test your products to North American product safety standards, you may be led to believe that your choices are limited to certain marks, such as the UL Listed Mark. In reality, there are others equally recognized and accepted — prominent among them, the ETL Listed Mark issued by the ETL SEMKO division of Intertek.

Like the UL Mark, the ETL Listed Mark shows that your product has been independently tested by a Nationally Recognized Testing Laboratory (NRTL). That it has met the minimum requirements of widely accepted product safety standards. And that you have agreed to periodic follow-up inspections to verify continued compliance. And like the UL Mark, the ETL Listed Mark is recognized and readily accepted by manufacturers, retailers, distributors and authorities having jurisdiction (AHJs).

WHAT IT MEANS TO BE AN NRTL.

The NRTL program is part of the Occupational Safety and Health Administration's directive to ensure products are safe for use in the U.S. workplace. It recognizes the capabilities of private-sector organizations to determine whether a specific product meets safety standards developed by the American National Standards Institute (ANSI), Underwriters Laboratories (UL), and others.

As an OSHA-recognized NRTL*, Intertek has the authority to provide independent evaluation, product safety testing and certification for electrically operated or gas- or oil-fired products, and to include those that successfully complete testing in our Directory of Listed Products. This compilation of more than 40,000 products is published annually, and is also available online at www.intertek-etlsemko.com.

A TESTING PARTNER IS WHAT COUNTS.

If any OSHA-recognized NRTL can provide product safety testing and certification, what's the real difference between the ETL Listed and UL Marks? The difference is Intertek's responsive, customer-first service.

Just as important, we answer to your needs and your schedules through a global network of state-of-the-art laboratories that offers fast, flexible testing no matter where you're located. So you can bring your products to market more quickly, more smoothly and more costeffectively than ever before. For additional information about product safety testing with Intertek, visit www.intertek-etlsemko.com.

^{*} Intertek operates in the U.S.A. as Intertek Testing Services NA, Inc., and is recognized by OSHA as a Nationally Recognized Testing Laboratory.

COMMONLY ASKED QUESTIONS ABOUT THE ETL LISTED MARK.

What's the difference between the ETL Listed and UL Listed Marks?

Both marks indicate that a product meets the minimum requirements of widely accepted product safety standards, determined through independent testing by a Nationally Recognized Testing Laboratory (NRTL). So the only real difference between the marks is in the service of the testing laboratories behind them. Intertek's custom-tailored testing, quick turnarounds and flexible work methods promote collaboration between testing lab and manufacturer, to bring products to market more quickly, smoothly and cost-effectively.

Are manufacturers required to use UL for their compliance testing?

No. In fact, this misconception has misled many to believe that they don't have a choice in third-party testing partners. The only major requirement is that the laboratory performing the testing is an OSHA-recognized NRTL. Consequently, our ETL Listed Mark serves as an indicator of compliance with applicable product safety standards.

What products bear the ETL Listed Mark?

Intertek provides product safety testing and certification for a wide range of our Directory of Listed

industries. In our *Directory of Listed Products*, which is easily accessed at www.intertek-etlsemko.com, you'll find over 40,000 products from telephones to x-ray machines, manufactured by companies like AT&T, Dell, Ericsson, General Electric, Panasonic and Philips.

Do retailers accept products bearing the ETL Listed Mark?

Since we are an OSHA-recognized NRTL, and the ETL Listed Mark is a recognized and accepted indicator of product compliance, there is no reason why a retailer would not accept ETL Listed products. Major North American retailers — including JCPenney, Sears, Costco and Target — accept the ETL Listed Mark.
